

SFT161X Agile
16 IN 1 HDMI to ANALOG MODULATOR

INTRODUCTION

The SFT161X is developed specifically for the commercial AV distribution market. It takes in 16 HD signals and then modulates the HD signals into any analog channels, providing an easy way to distribute high definition signals to the old TV systems. With pre-programmed channel list and its agile ability, the operators can set up the modulator intuitively and easily.

FEATURES

1. Converts HD video and audio signals to analogy NTSC or PAL channel
2. Rack mountable 1RU rack space with less space and less shipping cost
3. High picture quality thanks to the 16 HDMI input
4. Internal fans cooling system for long life span

SPECIFICATION

INPUT			
Input Connector	HDMI*16		
VIDEO	Input Resolution	1920*1080_60P; 1920*1080_50P; 1920*1080_60i;	
		1920*1080_50i; 1280*720_60P; 1280*720_50P	
OUTPUT			
RF	Output Connector	F-Female	
	Output Frequency	45 ~ 870 MHz	
	Output Level	105dB μ V	
	Adjust Range	0 ~ 20dB	
	Output-band Rejection	\geq 60dB	
GENERAL			
Power Supply	110V ~ 220V	Power Consumption	<W
Shipping Weight	6.5 KG	Dimension	1RU 19''
